## It Does Rain Fish

Dropping fingerling trout from airplanes is Quebec's latest method of restocking Northern lakes.

By ROBERT D. FORSTER

Heavy rain provides the backdrop of St. Francis, which means the fish will fly as they are ready for their descent from the sky.

Light drizzling a sign of good weather in the province's fish capital, St. Francis.

IT RAINS like you can see it drop—but no shadow of a fish hangs in the clouds of Quebec's St. Francis lake. The rain is falling, but the fish are not.

Yet thousands of fingerlings are being dropped from the sky. The fish are being dropped from the sky. The fish are being dropped from the sky.

Just as airplanes are being used to transport thousands of fingerlings to Quebec's remote lakes, so are they being used to transport thousands of fingerlings to Quebec's remote lakes. The fish are being dropped from the sky. The fish are being dropped from the sky.

Quebec's Department of Fisheries is taking advantage of the rain to drop the fish. The fish are being dropped from the sky. The fish are being dropped from the sky.

First, starting from the sky, a small plane drops the fish. The fish are being dropped from the sky. The fish are being dropped from the sky.

WELL, Champion Spark Plug dealers everywhere, remind us you that we're here to deliver every performance by way of special service we offer during National Spark Plug Change Week.

Bring your car to one of us for a check up of your spark plugs. We will see them, clean them, and show you how old, worn spark plugs waste gas and why a new set of Champions will save time, save your cost and insure quick starting, better acceleration and all around better engine performance.

Our new Silver-World Champion Spark Plugs positively eliminate troublesome leakage common to ordinary spark plugs. We strongly urge every motorist, not using these new and improved Champions, to install a set now—especially if your present plugs have gone 10,000 miles or more because it's no "fender" in a set can cause rough, uneven and wasteful engine operation.

● In the long, hot grind of summer driving, your motor needs the best of fuels. It needs the extreme oiliness of Mobilul.

Seemingly years of constant research in the Mobilul Laboratories have disclosed ways of removing those elements which go to poison under heat. Sludge-forming elements, carbon-forming elements and other unwanted materials are taken out. Mobilul is practically 100% lubrication. It's the essence of the oils.
